PROFESSIONAL SUMMARY

Results-driven **.NET Full Stack Developer** with 2.5+ years of experience building scalable, high-performance web applications and AI-integrated platforms. Proficient in **C#, .NET Core 8, React, SQL Server, and PostgreSQL**, with hands-on expertise in **Azure cloud services** (Functions, Blob Storage, Azure AD) and CI/CD pipelines. Designed and shipped a production-grade **RAG-based AI chatbot** using Azure OpenAI, FastAPI, and pgVector. Holds **Microsoft Azure AI Engineer Associate** and **Azure AI Fundamentals** certifications. Adept at Clean Architecture, RESTful API design, and delivering maintainable solutions aligned with modern engineering best practices.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core 8, ASP.NET Core, Python, FastAPI, JavaScript, TypeScript

Frontend: React.js, Redux, PrimeReact, Formik, HTML5, CSS3, Bootstrap

Backend & Architecture: Web API, Entity Framework Core, Clean Architecture, RESTful APIs, Dependency Injection, SOLID Principles

Databases: SQL Server, PostgreSQL, pgVector, Stored Procedures, Query Optimization, Database Design

Cloud & DevOps: Azure Functions, Azure Blob Storage, Azure AD, Azure DevOps, CI/CD Pipelines, Microsoft Azure

AI & Machine Learning: Azure OpenAI, Azure AI Services, RAG Pipelines, Vector Embeddings, Semantic Search, Azure Cognitive Search, Azure AI Studio, Responsible AI, NLP, Computer Vision

Security & Auth: JWT Authentication, Role-Based Access Control (RBAC), API Rate Limiting, OTP-Based Auth, Azure AD

Tools & Collaboration: Git, GitHub, Postman, Swagger, Agile/Scrum, Figma, WhatsApp Meta API, Brevor

CERTIFICATIONS

- **Microsoft Certified: Azure AI Engineer Associate (AI-102)** — Microsoft | [View Credential](#) ■
- **Microsoft Certified: Azure AI Fundamentals (AI-900)** — Microsoft | [View Credential](#) ■

WORK EXPERIENCE

Associate – Technology | Arieotech Solutions

Apr 2025 – Present

- Architected and deployed an end-to-end **RAG-based AI chatbot** using Azure OpenAI, FastAPI, and pgVector, enabling semantic document search across enterprise knowledge bases and reducing manual query resolution time by ~40%.
- Engineered **Azure Functions-based serverless APIs** consumed by React.js front-ends, improving backend scalability and reducing infrastructure overhead for high-concurrency workloads.
- Optimized **SQL Server and PostgreSQL** stored procedures and query plans, achieving measurable reductions in data retrieval latency across multiple product modules.
- Integrated **Azure Blob Storage and Azure AD authentication** into production modules, ensuring secure, scalable document handling and role-gated access across cloud-deployed services.

Junior Associate – Technology | Arieotech Solutions

Jul 2024 – Apr 2025

- Delivered production-quality features in **ASP.NET Core 8** following **Clean Architecture** and SOLID principles, contributing to 3+ live client-facing product releases.
- Built and maintained **RESTful APIs** with Entity Framework Core, reducing data access boilerplate and improving team development velocity across sprint cycles.
- Enhanced UI/UX components using **PrimeReact and TypeScript**; managed versioning and deployments via GitHub, maintaining zero-downtime release workflows.

Project Trainee | Arieotech Solutions

Aug 2023 – Jun 2024

- Designed and built an end-to-end **Employee-Department Management System** — relational schema, stored procedures, CRUD APIs in ASP.NET Core, and a React UI — as a solo full-stack project.
- Translated internship learnings into production-ready code within 3 months, gaining hands-on proficiency in **JavaScript, SQL Server, and ASP.NET Core**.

PROJECTS

AI-Powered Knowledge Base & RAG Chatbot Platform | React.js · FastAPI · Azure OpenAI · PostgreSQL/pgVector · Azure Blob Storage · JWT

- Built a production-grade **document Q&A platform** with full PDF ingestion pipeline — parsing, chunking, embedding generation, and semantic vector search — reducing document lookup time by 60%+ vs. manual search.
- Implemented a **RAG workflow** retrieving top-K relevant chunks from pgVector to generate context-aware AI responses via Azure OpenAI, achieving high answer relevance across diverse document types.
- Enabled **real-time streaming chat (SSE)** with persistent conversation history, markdown rendering, and multi-session continuity for a seamless user experience.
- Enforced **JWT-based auth and RBAC** across all endpoints; deployed the full stack on Microsoft Azure with Azure Blob Storage for scalable document management.

Smart QR Electoral Data System | React.js · Azure Functions · Azure OpenAI · Azure Blob Storage

- Leveraged **Azure OpenAI** to intelligently extract and structure data from electoral roll PDFs, eliminating manual data entry and reducing processing effort by an estimated 70%.
- Built **serverless REST APIs** using Azure Functions for secure, scalable PDF ingestion and backend processing, supporting high-volume document workflows.
- Developed a **mobile-first React web app** following Figma UX/UI designs — enabling field workers to scan and process electoral PDFs directly from mobile devices.

Driving School Management SaaS Platform | React.js · PrimeReact · Azure Functions · Flutter APIs · Brevo · WhatsApp Meta API · Azure

- Architected a **multi-platform SaaS backend** using Azure Functions, powering a React.js admin dashboard and Flutter mobile apps for trainers and students simultaneously.
- Implemented **role-based access control** for admins, trainers, and students; designed auth, data sync, and business logic APIs across web and mobile surfaces.
- Integrated **OTP-based authentication** (Brevo Email) and **WhatsApp Meta API** for transactional and promotional messaging, improving user onboarding flows.
- Deployed and managed the **complete application stack on Microsoft Azure**, ensuring high availability and clean API contract design for cross-platform compatibility.

EDUCATION

Bachelor of Engineering (BE) — Computer Engineering

PES Modern College of Engineering, Pune, India

2019 – 2023
